Revisions and data update

On the press release day, INE has updated BTI data series corresponding to the last 13 months. In the case of calendar adjusted and seasonally and calendar adjusted series, according to INE standard, the series are revised since its beginning. The results are available at [INEbase](#).

Current press release at: <https://www.ine.es/dyngs/Prensa/en/ICNE0724.htm>

Methodological note

The Business Turnover Index (BTI) is a short-term synthesis statistical operation aiming at obtaining an indicator to measure the short-term evolution of turnover, as a whole, for non-financial economic sectors: *Extractive and manufacturing industries, Electrical energy and water, Trade and Non-financial services*.

Survey Type: continuous monthly survey.

Base year: 2021.

Population scope: turnover of the economic sectors *Extractive and manufacturing industries, Electricity and water supply, sanitation and waste management, Commerce and non-financial market services*.

Geographical scope: the whole national territory.

Results reference period: the calendar month.

Information sources: it is compiled using information from three statistical operations carried out by INE: Industry turnover indices (ITI), service sector activity indicators (SSAI) and retail trade indices (RTI). In addition, existing information from administrative registers is utilized: sales declared by large companies in their VAT returns in the sector not covered by the surveys previously mentioned.

Further information is available in the [methodology](#) and the [standardized methodological report](#).

INE's statistics are produced according to the European Statistics Code of Practice. For further information at [Quality at INE and Code of Practice](#).
